

Faux Postage Technique using Perennial Postage Dies and Sending Love stamp set

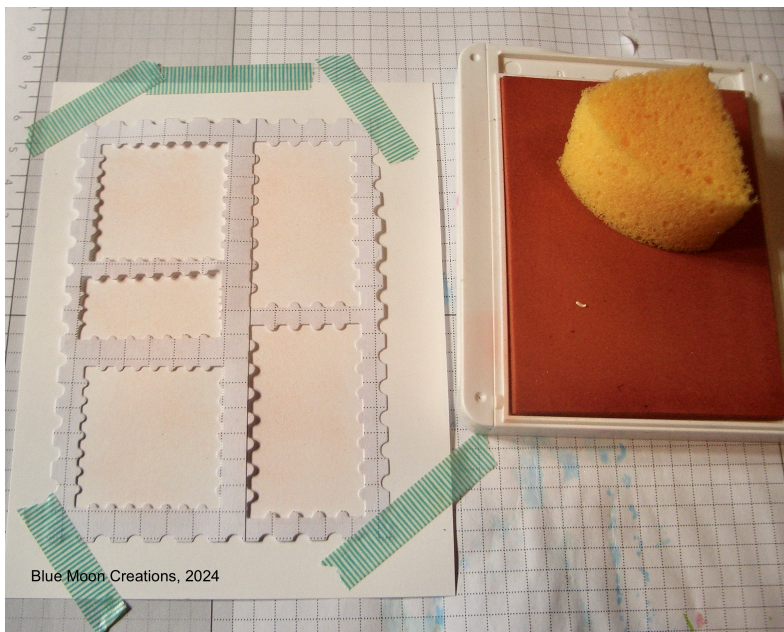

Create postage stencil:

-die-cut a piece of paper using the Perennial Postage die. I used a piece of Grid Sheet paper so I could use the grid lines to help line up the dies in the next step. You could use copy paper or card stock.

-Lay smaller Perennial Postage dies on the stencil and die-cut creating open stencil spaces

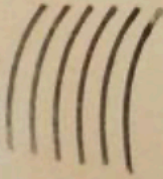

Lay the stencil on Basic White card front using washi or painter's tape to hold the card front and stencil in place. With a sponge, sponge dauber, or Blending Brush, add Petal Pink ink to the cut spaces of the stencil.

Stamp images from Sending Love in each of the spaces. Color hearts using a variety of Stampin' Blends or Stampin' Write Markers. Remove stencil when satisfied.

TIP: Use the grid sheet stencil cut-out pieces as masks to cover individual squares to prevent over-stamping into other blocks as needed.
